Yleem: g 3/2

re: Hq Garage - Determination of No Impact letter to Simpson

1. Regarding project description to NCPC - Building Finishes we said "precast concrete, color and texture compatible with existing Headquarters buildings !!

NRH opinion { Our proposed change to stucco on CMU will not change the form of the building and will, in our mind, be compatible. Such a change should be no more problem to NCPC than a minor S.F./dimension change or slight variation number of vehicles to be parked. Of greater visual impact would be total deletion of the canopies.

2. A final NCPC review is required when the design is complete and ready to bid. I suggest that we inform NCPC at that time of the design changes since they approved the Preliminary Site & Building Plans to make their review easier.

3. Jo Hartman (GSA) agrees with my opinions in 1 & 2, but will contact Mr Promnick of NCPC in the next few days to check it out. I will write an M/R after hearing from Hartman re NCPC view

Bob.

file please
